PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate with hands-on experience in full-stack web development using Python and Django. Demonstrated ability to design and deliver production-ready web applications with features including role-based authentication, OTP-based login, email notifications, and AI chatbot integration. Strong foundation in backend engineering, database design (MySQL), and REST API development. Eager to contribute to agile teams and solve real-world problems through clean, maintainable code.

TECHNICAL SKILLS

Programming Languages	<i>Python, JavaScript (ES6+), HTML5, CSS3</i>
Frameworks & Libraries	<i>Django, Django REST Framework, Bootstrap 5</i>
Databases	<i>MySQL, SQLite</i>
Tools & Platforms	<i>Git, GitHub, VS Code, Postman, Linux CLI</i>
Core Concepts	<i>OOP, MVC Architecture, REST APIs, Role-Based Access Control (RBAC)</i>
AI / Third-Party APIs	<i>OpenRouter API (LLM integration), SMTP Email Services</i>

PROJECTS

VaultX – Warranty Management System – Django | MySQL | OpenRouter API 2025

GitHub: github.com/pavi-stark/vaultx_EY_project

- Built a full-stack warranty management platform using Django (MVC), MySQL, and Bootstrap 5 with 3 distinct user roles: Customer, Seller, and Service Center.
- Implemented OTP-based authentication using SMTP email service to verify user identity during login and registration, improving security.
- Designed and developed role-based dashboards enabling customers to submit claims, sellers to manage product warranties, and service centers to update repair status.
- Integrated an AI-powered chatbot using OpenRouter API to assist users with warranty queries and ticket status in real time.
- Engineered an end-to-end claim tracking and service status management system with full audit trail in the database.
- Applied RESTful design patterns for internal API endpoints and performed thorough testing using Postman.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science – Adhiparasakthi Engineering College,
Melmaruvathur *Expected: March 2027*

GPA-8.0

Percentage:80.91%

Higher Secondary Certificate (HSC) – Computer Science – Montfort Matriculation Higher Secondary School, Tindivanam *March 2023*

- Scored 73.34% in Computer Science stream with focus on programming fundamentals.

CERTIFICATIONS & ACHIEVEMENTS

NVIDIA Deep Learning Institute Certification

ID: 001Pe3oRveSIW0nYI1ga0

Skill Intern Certification

ID: SICAC19679

AWS Certified Cloud Practitioner – [View Badge on Credly](#)

PROFESSIONAL & SOFT SKILLS

- Analytical problem-solving with a structured, systematic debugging approach.
- Strong written and verbal communication skills; able to document technical work clearly.
- Self-directed learner: consistently upskills through online courses, certifications, and personal projects.
- Collaborative team player with experience working in academic group projects and online learning communities.
- Time management and ability to balance academic workload alongside project development.

INTERESTS & ACTIVITIES

- Open-source contribution and exploring new Python libraries and Django packages.
- Exploring AI/ML concepts and integrating LLM APIs into practical web applications.
- Participating in coding contests on platforms like HackerRank and LeetCode.
- Freelancing and online income opportunities in the web development and digital product space.
